## Free ac dc ringtones for iphone

The roar of ac/DC's mammoth power chords became one of the most influential loud rock sounds of the 70s and one of the defining sounds of rock and metal. In its own way, it was a reaction to the swaggering art stones and arena rocks that fell asleep in the early 70s. Ac/DC rock is minimalist – no matter how big and bludgeoning their guitar chords are, there is a clear sense of space and restraint. Combined with Bon Scott's larynx-shredding vocals, the band spawned countless imitators over the next two decades and enjoyed commercial success well into the 2000s, scoring their biggest hits after Brian Johnson replaced the late Scott.AC/DC formed in 1973 in Australia by guitarist Malcolm Young after his previous band, the Velvet Underground, collapsed (nothing to do with the seminal American group). With his younger brother Angus serving as lead guitarist, the band played several shows around Sydney. Angus was only 18 at the time, and his sister suggested that he wear his school uniform on stage; display becomes a visual trademark of the band. While still in Sydney, the original cast featuring singer Dave Evans cut a single titled Can I Sit Next to You, with former Easybeats players Harry Vanda and George Young (Malcolm and older brother Angus) producing. The band moved to Melbourne the following year, where drummer Phil Rudd (formerly of Coloured Balls) and bassist Mark Evans joined the lineup. The band's driver, Bon Scott, became the lead vocalist when singer Dave Evans refused to take to the stage. Previously, Scott had been a vocalist for Australian rock band Fraternity and the Valentines. More importantly, he helped cement the group's image as a brutes -- he had several convictions for minor crimes and was rejected by the Australian Army for social maladjusted. AC/DC social maladjusted. Throughout their careers, they loved the rough double entendres and violent imagery, all spiked with a mischievous sense of fun. The group released two albums -- High Voltage and T.N.T. -- in Australia in 1974 and 1975. The material from the two records consists of the 1976 High Voltage Release release in the US and UK; the group also traveled to both countries. Dirty Deeds Done Cheap Dirt followed at the end of the year. In the fall of 1977, AC/DC released Let There Be Rock, which became their first album to hit the charts in the US Mark Evans left the band soon after with Cliff Williams replacing him. Powerage, released in the spring of 1978, expanded their audience even further, thanks not least to their dynamic live performances (captured on the 1978 live If You Want Blood You've Got It). What really broke down the door for the band was Highway to Hell the following year, which reached number 17 in the US number eight in the UK, becoming the group's first million sellers. The AC/DC train derailed when Bon Scott died on February 19, 1980. The coroner's report officially stated he had been drunk to death. In March, the band replaced Scott with Brian Brian The following month, they recorded Back in Black, which would prove to be their biggest album, selling more than ten million copies in the US alone. Over the next few years, the band was one of the biggest rock bands in the world, with For Those About to Rock We Salute You topping the charts in the US. In 1983, Rudd went after the flick of the switch; he was replaced by Simon Wright.With Flick of the Switch, AC/DC's commercial standing began to slip, and they were unable to reverse their slide until 1990's The Razor's Edge, which spawned the hit Thunderstruck. While not the commercial powerhouses they lived in during the late 70s and early 80s, the 90s saw AC/DC maintain their status as the top international concert draw. In the fall of 1995, their 16th album, Ballbreaker, was released. Produced by Rick Rubin, the album received some of the most positive reviews of his AC/DC career; it also entered the American charts at number four and sold over a million copies in its first six months of release. Stiff Upper Lip followed in early 2000 with the same result. AC/DC signed a multi-album deal with Sony in 2001 that resulted in numerous reissues and DVDs, and they returned to the studio in 2008 for Black Ice, a collection of new songs that topped the charts in various countries (including Australia, the US and the UK) and was followed by the group's first world tour since 2011. Two years later, the band's music was featured in the action film Iron Man 2, and a compilation was released in conjunction with the film Iron Man 2. When AC/DC began working on a new album with producer Brendan O'Brien in 2014, they announced that Malcolm Young was suffering from dementia and had left the band; His nephew Stevie Young took his place in recording sessions and an accompanying 40th birthday tour, and later joined the group full-time. Just before the December release of Rock or Bust, drummer Phil Rudd was arrested on charges of attempting to obtain murder, threatening to kill, and possession of marijuana and methamphetamine. Although charges of murder are set to be dropped, others remain and the drummer's future with the band uncertain. Nevertheless, AC/DC is marching forward with the release of Rock or Bust and plans to tour in 2015. In 2017, Malcolm Young died in November at the age of 64. After a two-year hiatus, the band reunited with producer Brendan O'Brien for their 17th studio album, Power Up, which became their third consecutive number one album in Australia and their third chart-topper in the US – Stephen Thomas Erlewine Enjoy a free AC DC ringtone experience on your phone and surprise your friendsTop ac dc Ringtones List :- Thunderstruck ringtones,- Back to Black ringtones,- rising strength,- highway to hell,- Hells Bells,- shooting menggetarkan,- TNT,- jauh ke atas,- kereta rock n roll,- Ball breaker,- Big Balls,- Big Gun,- For Those About To Rock,- Get It Hot,- Girls Got Got Hell is a bad place to be-- high voltage,- if you want blood,- jailbreak,- let me put my love into you-- let there be stoness,- money talk,- troubled kid,- he's got a jack,- razor edge,- war machine,- that makes who-- the whole Lotta Rosie,- you rocked me all night,- inspired & More...
